RIVALE PROFILE

the ultimate revolution

RIVALE PROFILE is the first ultra-equipped luminaire in AYRTON's brand new "ULTIMATE" series, all models being perfectly homothetic and sharing common features, delivering previously unimaginable weight to output ratios.

Developed for mixed use indoors and outdoors, and in all conditions, RIVALE PROFILE, with its unique visual signature, is unparalleled on the market.

Weight determines performance, and RIVALE PROFILE weighs only 30.8 kg. It is capable of outstanding performance unprecedented for a product in this category.

To allow you more creativity and freedom in your lighting design, RIVALE PROFILE has been provided with continuous rotation of the pan and tilt movement.

Meticulously Engineered for the Most Demanding Conditions Weatherproof, Resilient, and Uncompromising in Performance

The Onyx Series is a weatherized speaker system designed for reliable outdoor audio performance. Engineered to withstand the elements, it combines durable construction with precise sound reproduction, making it ideal for permanent outdoor installations. Whether for public spaces, stadiums, or open-air venues, the series ensures consistent, high-quality sound in any environment.

Built to endure harsh conditions, the Onyx Series features rugged enclosures with advanced coatings and IP-rated protection against dust and moisture. Its optimized transducer technology delivers clear, balanced coverage, ensuring seamless integration into large-scale distributed systems while maintaining superior clarity and projection.

Designed for efficiency, the Onyx Series includes intuitive controls, secure mounting options, and concealed inputs for a streamlined installation process. With its blend of durability, precision, and ease of use, the Onyx Series is the perfect solution for outdoor audio applications requiring long-term reliability.
