Delta 930 LA

Twin 10" High performance Line Array

Curated for medium-sized touring and high-energy installations, the Delta 930 LA is engineered to exceed industry standards with superior audio fidelity. Incorporating British Acoustics' advanced technologies, it features a pressure-mounted HF transducer with a uniFlow™ Waveguide and the Lock-n-Stock™ mechanism for seamless stacking of two units over the Delta 918 FS for quick deployment.

With folded reflex 10" transducers, it operates in passive or bi-amplified mode via a rear relay switch. Paired with XD or X racks, it's ideal for live performances, tours, theatres, nightclubs, houses of worship, and corporate events, with integrated rigging for fast flying or ground stacking and adjustable splay angles for custom array curvature.

Power Rating
1100W Continuous

Max SPL
135 dB
